To Currently Practicing Optometrists in NSW

We are looking for up to 6 x Optometrists to join us for April/May/June/July (with one vacancy for March).

Because you will be assessing eye care for NSW secondary school students, your work hours will follow the school calendar. This means more holidays, and reduced working hours. There is also no weekend work, or late night shopping hours. This is great opportunity for an optometrist with kids – dropping off and picking up kids for school is easily accommodated by these hours. Also, this is great opportunity for an optometrist who wants a balance and blend of a city lifestyle.

Metropolitan areas – Opportunity to move back to city life if you've had to relocate to remote areas but have plans of practicing close to home.

Work/Life balance – Work only 41 weeks a year
Work during only the school term 8:30-3:30pm Monday to Fridays
Enjoy 3 x 2 weeks holidays in between School Terms
Enjoy 4 weeks holidays at the end of year
Extra days off on school curricular days (student free days).

Not commercial - Focus on providing professional eye care, not administrative work. We have a team of committed part-time mums to take care of this for you. Also, if you know of any part-time mums looking for admin work, please inform us!

Strong scope for career progression – We are rapidly growing, and there are heaps of opportunities for professional and career development, and practice management if you're up to the challenge.

Salary: \$71k total package (SALARY WILL INCREASE YEARLY TO COMPENSATE FOR INFLATION OR DUE TO CAREER PROMOTION)

Extra perks: Laptops + Internet will be supplied

Capacity to earn more – We believe these work hours allow for greater flexibility on your part. We will be understanding, or encouraging locum work on Thursday nights, Friday nights, and weekend work.

What we are looking for: Passion or interest in working with high school aged patients.

Please send your CV (no cover letter needed) to

Employment@OptometryInSchools.Com.Au ; we are recruiting on a rolling basis and will accept applications throughout the year.
